

Media Workshop, Graphics - What do we do Still Photography Storyboard

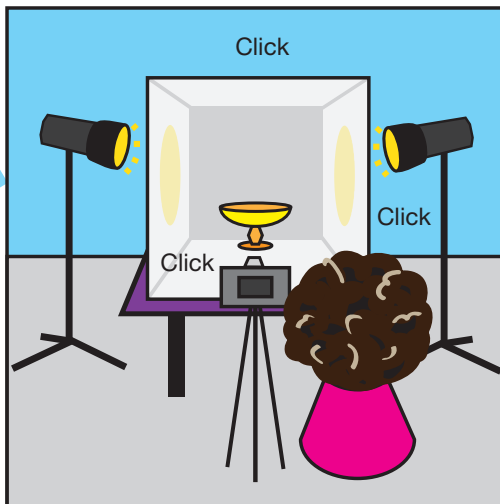

Tracy Chillingham would like some items photographed for a book she is writing. A colleague tells her she has had some books photographed for a book cover by Media Workshop.

Tracy contacts Annabel Ayreshire in Media Workshop.

The items are taken over to Media Workshop. Annabel discusses with Tracy the best way of photographing the objects.

The objects are photographed in the Cubelite. External lights shine through the cube reducing shadowing. The cube also reduces reflection.

The photos are transferred on to the computer.

In Photoshop Annabel tidies up the photographs and sends them to Tracy as jpeg files for use in printing and on the web.
