Institute of Public Care

- Part of Oxford Brookes University
- We work with central and local government, the NHS, charities and commercial organisations
- Our aim is to make a positive impact on people's health and wellbeing

What we do

Evaluation

Training

Consultancy

About this course

The aim of this course is to provide an introductory overview of the principles of commissioning, contracting and procurement in West Sussex, supporting you to considering you role within the commissioning process, and how you can contribute to good commissioning practices

Our approach

- Two whole day, in-person sessions to introduce good practice for commissioning in public care
- Content is based on the IPC Commissioning Cycle and our popular and well-established Commissioning Course
- Each session will include an introduction from areas of the commissioning cycle quadrants (analyse, plan, do, review), coupled with facilitated discussions / break out groups

The IPC Commissioning Cycle

Sessions 1 and 2

Session 1 – Analyse and Plan

- Recap of the definition of commissioning, and what it entails
- Consideration of the current national and local agenda influencing commissioning in West Sussex
- Needs assessment and gap analysis
- Introduction to Outcome Based Commissioning
- Optional accreditation

Session 2 – Do, Review and cross cutting

- Market intelligence and shaping
- Introduction to procurement and purchasing
- Managing provider relationships
- Outcomes Based & Performance Monitoring
- Engagement and involvement of local people in commissioning
- Commissioning Skills

By the end of the sessions, you will:

- Have evolved your knowledge and understanding of the different stages and activities of the commissioning cycle and awareness of your individual role, and roles of other colleagues and directorates, within the cycle.
- Be able to demonstrate understanding of the principles and theories of evidence-informed and outcome-based commissioning, and how this informs priorities and decision making across the commissioning cycle

Accreditation

- An opportunity to gain a qualification of your learning
- Accredited by Oxford Brookes University
- Awarded a Certificate of Credit, at a Level 4, worth 10 Credits

Through the accreditation process you will have an opportunity to:

- Implement good commissioning practice to ensure that commissioning activities achieve best value for money and good outcomes
- Demonstrate independent learning skills, including reflection on individual learning and practice
- *More on this later...*

Introductions

Time to introduce yourself...

Before we start...

Group Agreement

Creating a 'Commissioning World'

- Imagine a world where how we acquire services or support that help people have good health and wellbeing does not exist.
- If you were starting with a blank sheet of paper and you wanted to design an approach to ensure that everyone can experience good health and wellbeing, **what would be your top 5 priorities to make this happen and why?**

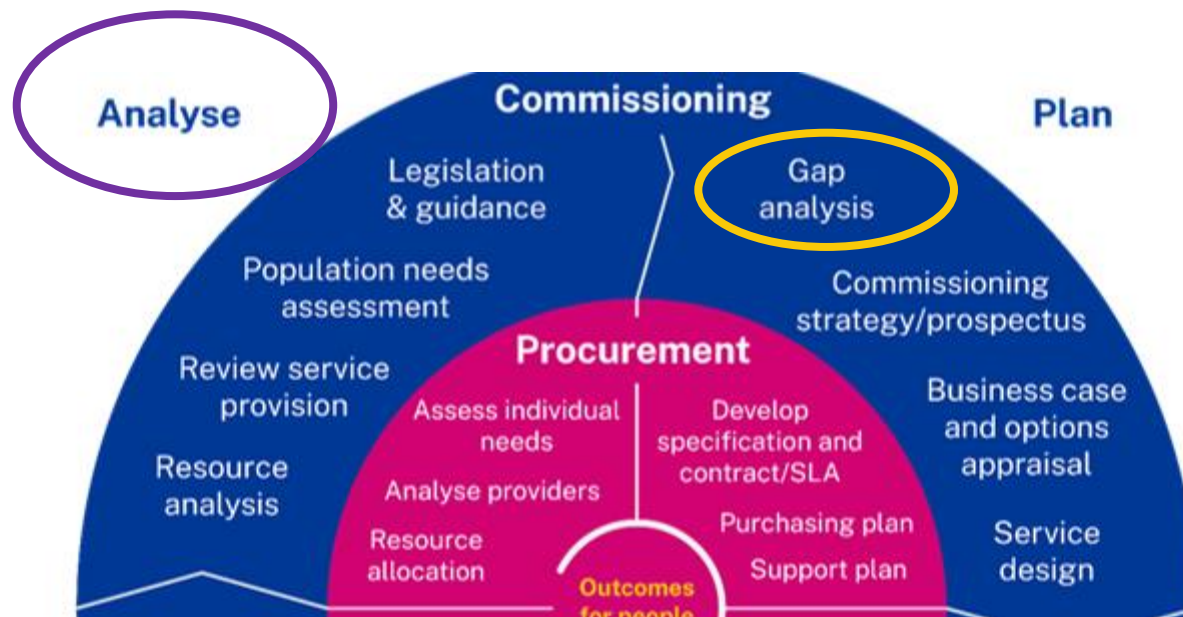

The IPC Commissioning Cycle

National drivers - summary

- Choice and control
- Integration
- Prevention and early intervention / help
- A focus on outcomes
- Digital inclusion
- Complex needs support
- Fixing the broken care market

Anything else?

West Sussex Strategic Drivers

On your landscape

In breakout groups:

1. What are the top 3 shared key themes affecting West Sussex or your service areas currently?
2. What are the implications of each of these themes for commissioning? What are the key challenges? Opportunities?
3. Be ready to feedback to the wider group your 3 'themes' and 1 challenge and 1 opportunity

What is a needs analysis?

What? A needs analysis is a way of estimating the nature and extent of the needs of a population so that services can be planned accordingly.

Why? The purpose is to help focus effort and resources where they are needed most.

How? A robust needs analysis provides commissioning agencies with a range of information that can feed into and inform the planning stage of the commissioning cycle.

Outcomes	
1 <input checked="" type="checkbox"/>	6 <input checked="" type="checkbox"/>
2 <input checked="" type="checkbox"/>	7 <input checked="" type="checkbox"/>
3 <input checked="" type="checkbox"/>	8 <input checked="" type="checkbox"/>
4 <input checked="" type="checkbox"/>	9 <input checked="" type="checkbox"/>
5 <input checked="" type="checkbox"/>	10 <input checked="" type="checkbox"/>

Needs analysis – what does it involve?

Needs analysis looking at whole populations and the needs of vulnerable groups

Understanding the legislation, research and best practice basis for services/interventions

Establishing a picture of total resources in the local area to map against priorities

Mapping and reviewing current services across agencies; in terms of range, quality and costs

Joint Strategic Needs Assessment

“A systematic method for analysing needs of populations to inform and guide commissioning of health, wellbeing and social care services within a local authority area.”

- A statutory duty since 2007; the JSNA will underpin the health and well-being strategies and commissioning plans
- It should draw on a wide range of data sources and focus on outcomes and the future
- Statutory Guidance DH 2013 - Joint Strategic Needs Assessments and Joint Health and Wellbeing Strategies

Intelligence will include:

1. National Statistics such as demographic data, risk factors, prevalence and incidence data
2. Local data collected by public bodies such as GP practice or hospital performance data
3. Views of patients/service users and carers
4. Information and performance data collected by private and independent providers
5. National Research findings

Who are the population we need to identify?

**Current
Population**

**Future
Population**

**Targeted
Population**

Populations we know less about – the known unknowns

Matching resources to needs

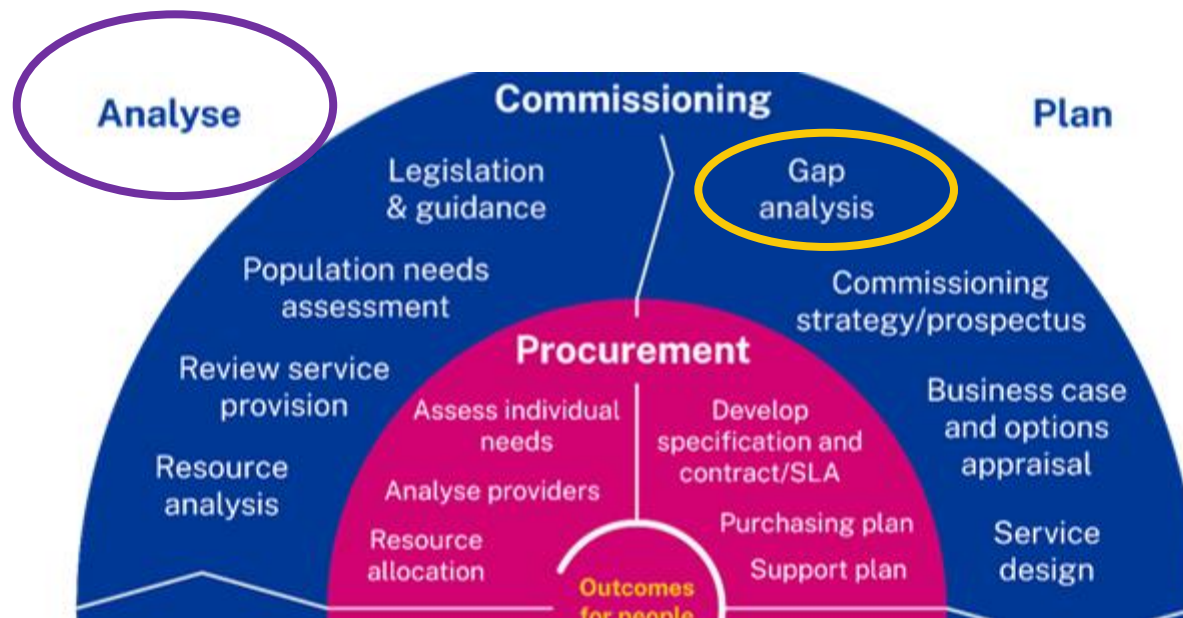

Breakout Discussion

- How aware are you of local data and information currently?
- How well do you use this to inform commissioning decisions (at all levels)?
- Identify 1 strength and 1 area of improvement for West Sussex or service area within the analyse quadrant of the commissioning cycle

Outcome Based Commissioning

Focussing on outcomes

“Public service commissioners are under increasing pressure to demonstrate the impact of their services on the beneficiary in terms of the outcomes achieved. To do this, they will need to focus on the impact on the service user and what has been achieved, rather than just how time and money have been spent.”

Social Finance (2015:2) Commissioning for outcomes across children's services and health and social care

What do we mean by outcomes?

Inputs

+ Processes

+ Outputs =

Outcomes!

Definitions

- **Outcome** – result or upshot
- **Output** – production; the amount of services produced in a given time
- **Process** – procedure, method or means
- **Input** – contribution or effort

Oxford English Dictionary

What do we mean by outcomes – our definition

“An outcome is a change in circumstances that results from the decisions we make and the actions we take”.

- Service user/carer outcomes
- Population or ‘system’ outcomes
- Social outcomes/Social Value
- Economic outcomes
- Efficiency outcomes
- Legal compliance outcomes

Outcome, output or process/input?

Objective	Type
1. Fewer service users will experience tenancy failure	
2. Develop a register of those receiving advocacy by June	
3. Fewer children in care will offend	
4. All staff will be paid at least minimum wage plus £1.50	
5. Reduce the vacancy rate by 5%	
6. Reduce the average waiting time to access the tier 3 CAMH service to 6 weeks	
7. There is a written equal opportunities policy	

An outcomes focus approach requires a shift in thinking

- .. from outputs to outcomes
- .. from activities to results
- .. from deficits to strengths
- .. from problems to solutions
- .. from needs to what matters
- .. from expert to facilitator

Things people like about an outcome-based approach

- Based on the person's desires, not service led.
- Holistic approach.
- Fits with person centred approaches; puts the individual at the centre.
- Empowers service users and promotes self advocacy.
- Emphasises evidence based practice.
- Focuses on needs and seeks positive interventions to provide better outcomes.
- It facilitates a co-productive approach using person's assets as well as services or support.

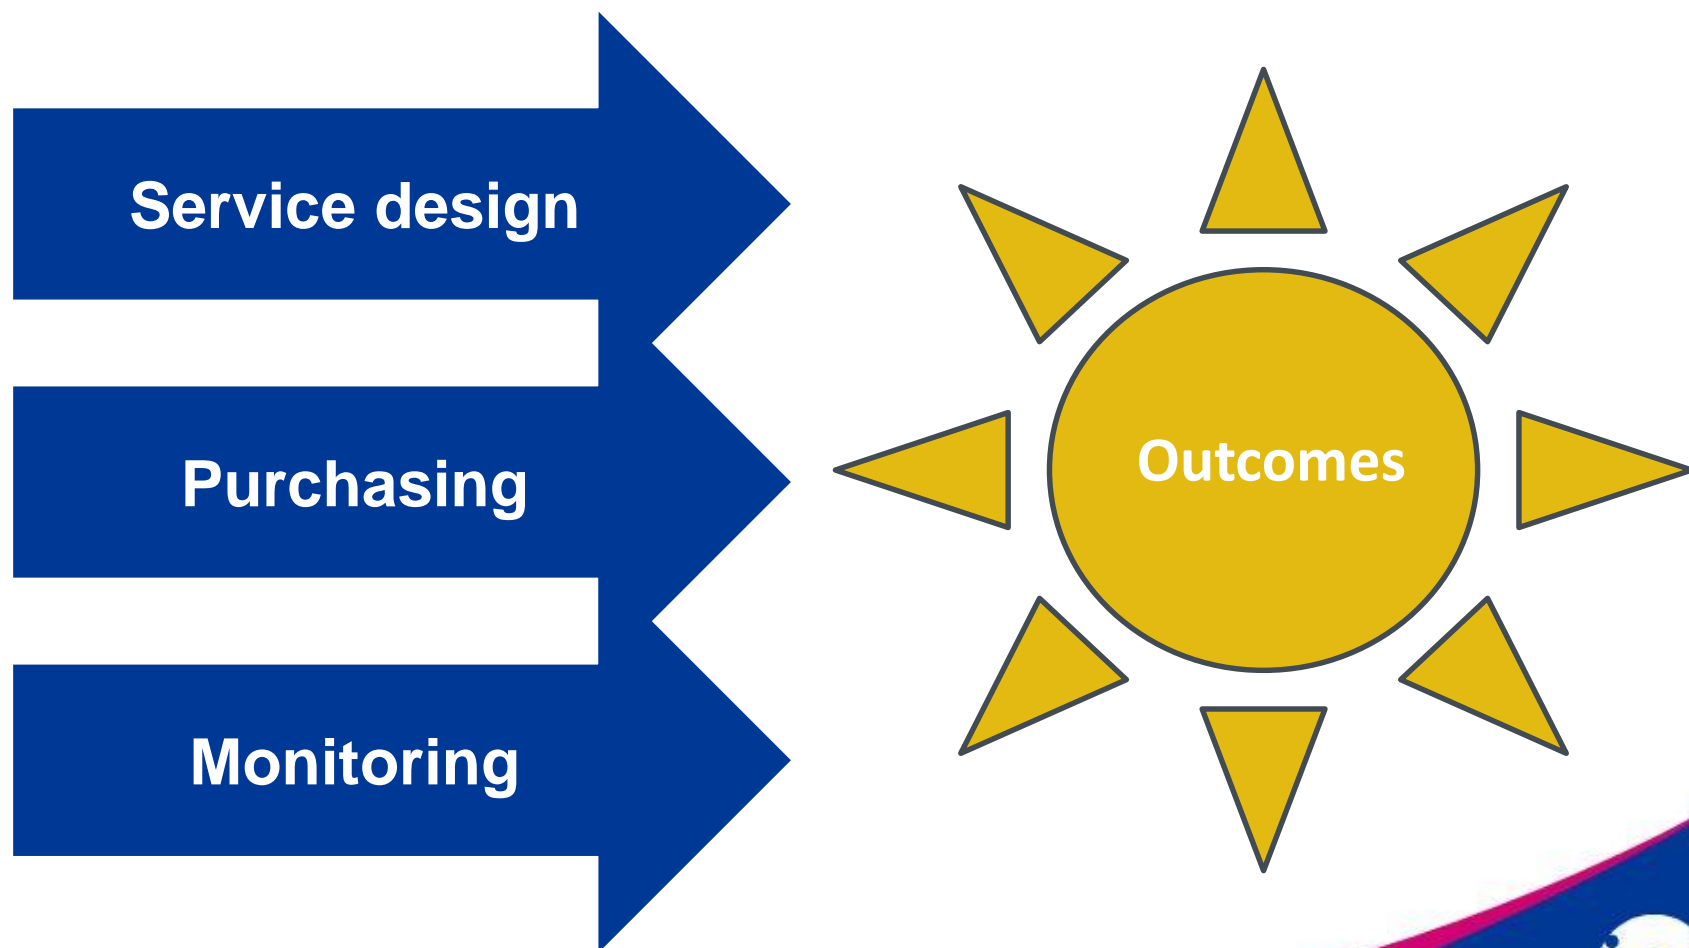

Working with outcomes – some challenges

Some of the main challenges of working with outcomes are:

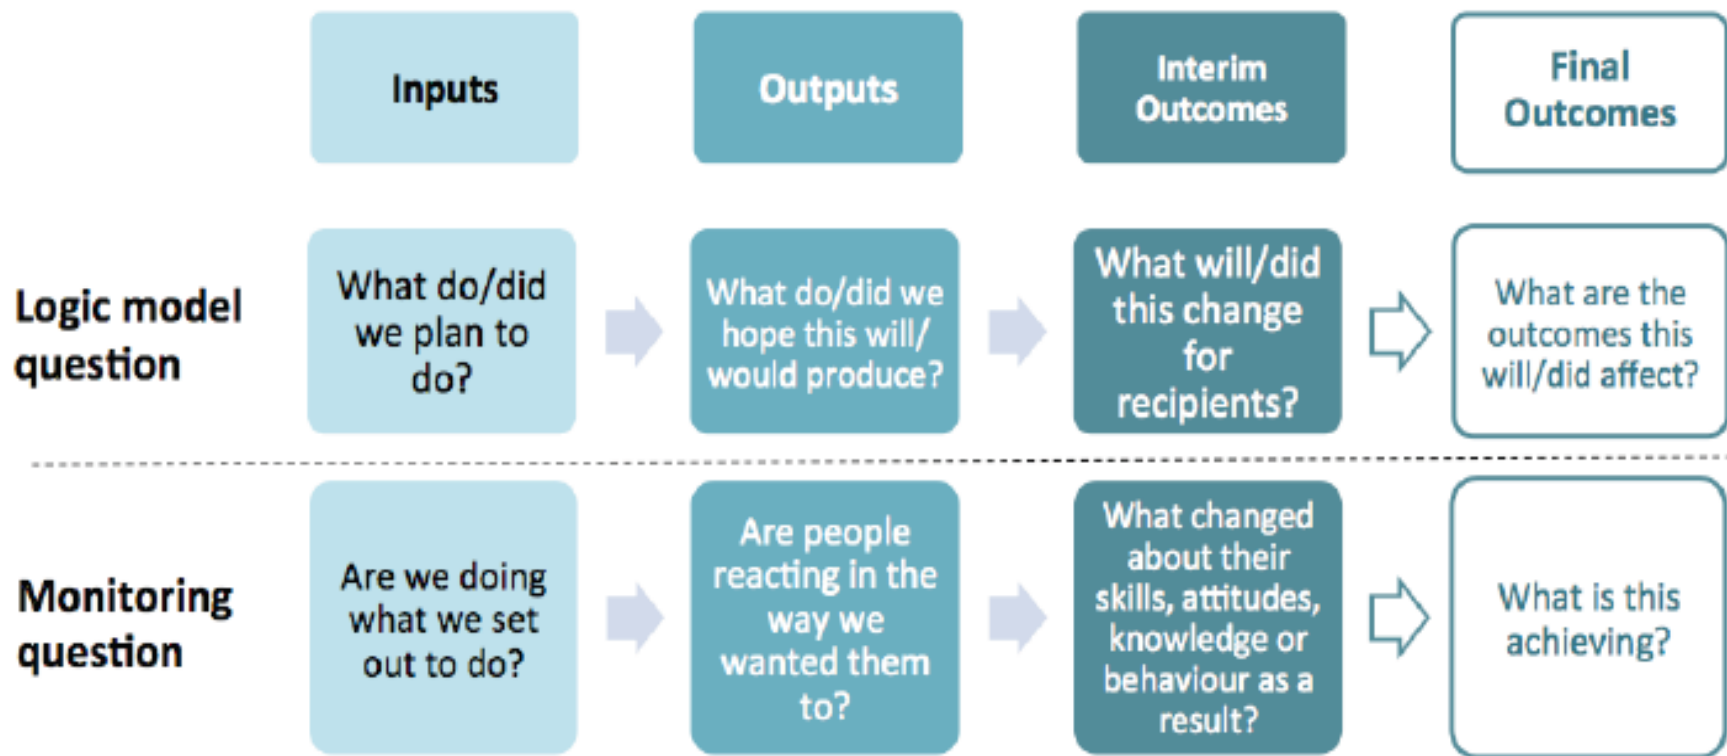

- Identifying and agreeing what outcomes we should be aiming for
- Getting everybody to work to outcomes
- Knowing the outcomes we want to achieve does not tell us what we need to do to achieve them
- Linking the identified outcomes to our activity
- Finding measures and methods to capture them

3 elements of an outcomes based approach

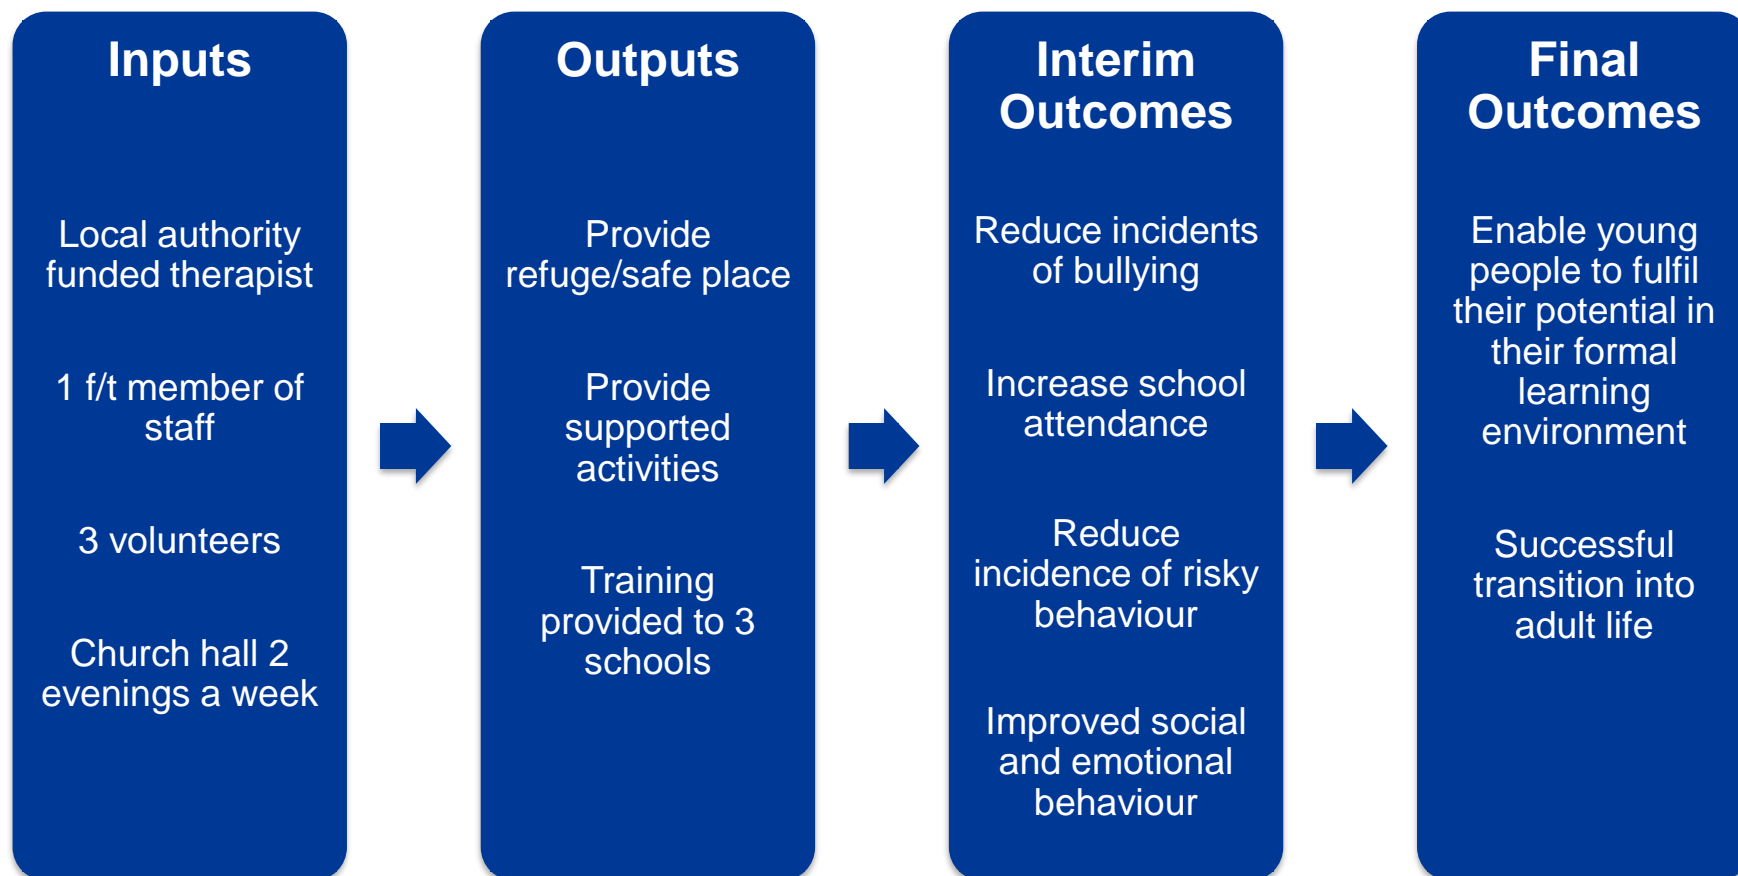

Outcomes-based service design – sequence of events

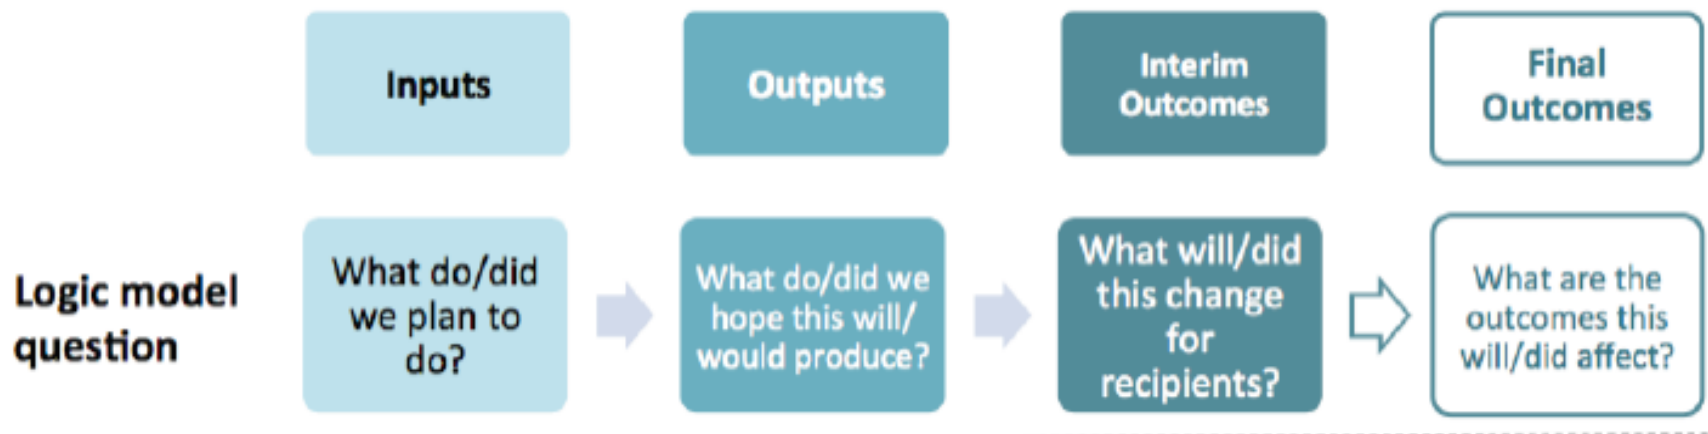

Children's Improvement Board (2012) Monitoring outcomes and quality assuring provision for children and young people with special educational needs

Example logic model

Breakout Exercise

1. Agree a target population group for you to focus on (e.g., children at the edge of care; drug and alcohol users or adults with learning disabilities)
2. Using a logic model, design an outcome-based service for your population group

Certificate of Credit in the Principles of Commissioning

OBU Course Code: WFPC4001

Certificate of Credit in the Principles of Commissioning

- An opportunity to gain a qualification of your learning
- Accredited by Oxford Brookes University
- Awarded a Certificate of Credit, at a Level 4, worth 10 Credits
- You become a student of OBU
- Entry criteria applies
- Additional input and a written assignment
- Access to IPC's Commissioning Alumni Network

The Assignment Task

Write a reflective commentary that describes a commissioning activity you have undertaken and how you managed the process. You should show how you applied the best practice you learnt on the course and what the challenges and barriers were, and any lessons there have been for your future practice.

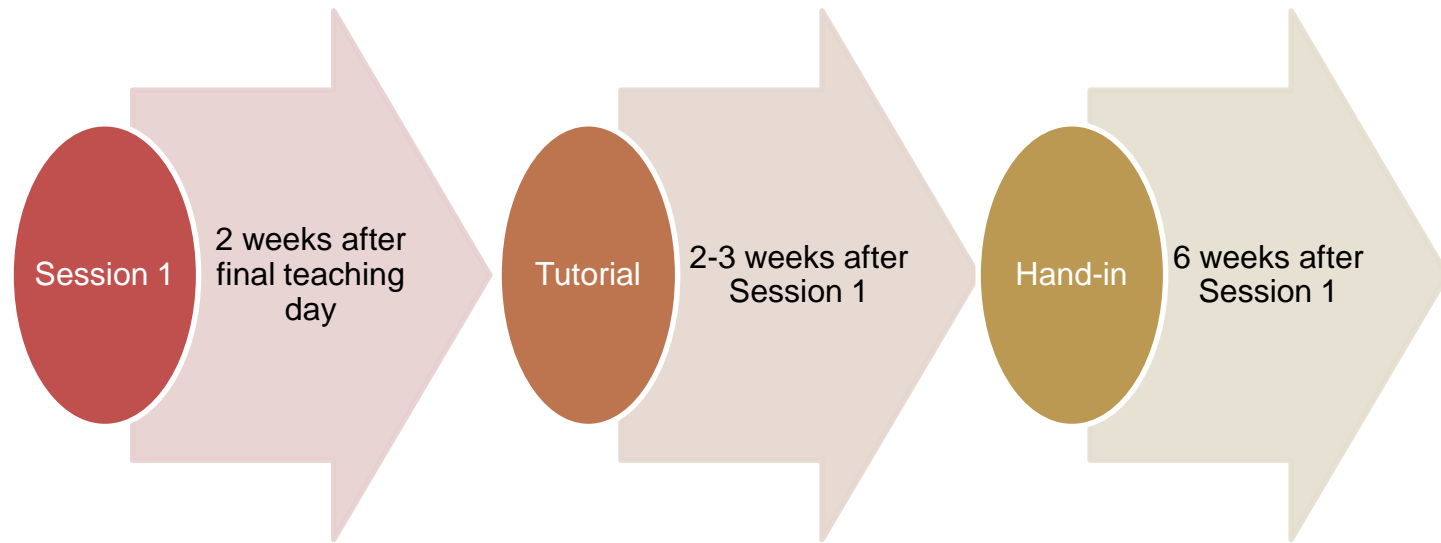

Word count is a minimum of 1,800 words and a maximum of 2,200 words

Example Assignment topics

- Performance monitoring a service
- Arranging an individual placement via a framework agreement
- Reviewing the outcomes or quality of a service provision
- Hosting a consultation event
- Completing a needs assessment or asset mapping
- Researching evidence-based interventions to meet a need
- Designing an outcomes-based service
- Collaborative working with the Provider market to resolve a gap or issue in provision

Assignment Support

IPC Commissioning Course Alumni Network

Bringing a community of commissioners together from across the country to share advice, good practice and support

A free and exclusive offer to any student with accreditation via:

- Regular online / virtual workshops
- Exciting face to face events – such as commissioning conferences
- Access to an online Forum

Alumni Network
