

How to find journals by title:

Sometimes a lecturer may recommend a journal, but not any particular articles for you to read and you can use the Library Search to help you find it.

1. Go to the library home page and choose the default [Library Search](https://oxfordbrookes.on.worldcat.org/discovery) search box or enter: <https://oxfordbrookes.on.worldcat.org/discovery>
2. In the search box, enter the **title of the journal** or article title. You can use **quotation marks** to retrieve exact title.
3. If we have the journal, you will see a link to any databases where it can be found, and the publication years covered.

The screenshot shows the search results for 'Management Decision' on the Oxford Brookes University library website. The search term 'management decision' is entered in the search bar. The results list several databases where the journal is available, including Emerald Insight. A callout box points to the 'Emerald Insight' entry in the 'Access Online' table, stating: 'I select Emerald as it has full text access from 1967 to the present day.' Another callout box points to the journal title in the search results, stating: 'Click on the title of the journal to see the databases and date range it is available on.'

Access Online	Publication	Database / Coverage
Access journal	Management Decision	Health Research Premium Collection (1992-01-01~365 days ago)
Access journal	Management Decision	ProQuest Health Management Database (1992-01-01~365 days ago)
Access journal	Management Decision	Emerald Insight

4. Select the link that covers the years you want. I selected Emerald as it has the longest date range covered. Click to go through to the database.
5. You will be taken to the Brookes Login screen where you enter your student/staff number and your Brookes password (tip: the same one you use for email and PIP)

The screenshot shows the 'OXFORD BROOKES UNIVERSITY LOGIN' screen. It includes the text 'This page permits access to Oxford Brookes online services' and 'Login to: Oxford Brookes University online resources'. There are two input fields: 'Username' and 'Password', and a 'Login »' button. Callout boxes provide instructions: 'Enter your student/staff number here' for the Username field and 'Enter your Brookes password here' for the Password field.

- 6. The databases will all look different but you can either use the volumes and issue numbers to navigate or search within the journal for a topic of interest to you.

The screenshot shows the Emerald Insight website interface for the journal 'Management Decision'. The page title is 'Volume List' and it indicates 413 issues are available from Volume 1 Issue 1 to Volume 56 Issue 8. A callout box points to the search bar with the text: 'Search within the journal of 'Management Decision' here'. Another callout box points to a specific issue entry (Volume 56, Issue 6) with the text: 'You can use volume and issue numbers to locate a particular article if you have those details.' The right sidebar contains 'Journal Information' including ISSN: 0025-1747, 'Online from: 1967', and 'Subject Area: Business, Management & Strategy'. Logos for Clarivate Analytics and Scopus are also visible.

- 7. When you have found the article you want, click on the PDF link to see the full text:

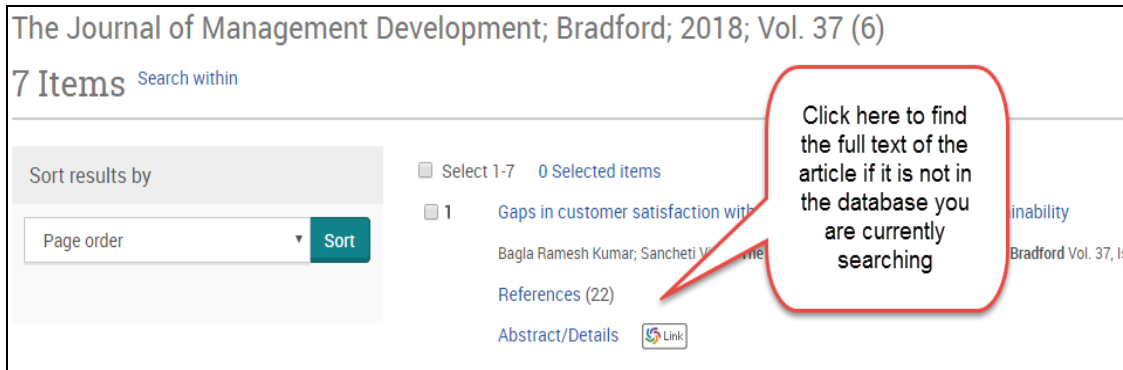

The screenshot shows a detailed view of an article titled 'Differential effects of macro... and by country among Saudi...'. The author list includes ByoungHo Jin, Moudi O. Almousa, Heesoon Yano, and others. The article is identified as a 'Research paper' and includes a list of keywords: 'Country image, Product category, Country moderating effect, Saudi consumers'. At the bottom, there are links for 'Abstract | HTML | PDF (232 KB) | Reprints and Permissions'. A callout box points to the 'PDF (232 KB)' link with the text: 'Click on the PDF to access the article'. An 'Open URL' button is also visible at the bottom left.

Further help:

- links you to the full text of articles

- When searching databases, look out for the full text finder link  which will find the full text of a journal article even if it is not available in the database you are currently searching in.

No full text access available?

- When we do not have access to the full text you will not see the link but articles and books can be obtained from other libraries:
 - Use the [InterLibrary Loan](#) service.

If you know the details of a particular article you'd like to find:

- Go to the library home page where the default tab for searching is [LibrarySearch](#).
- You can enter the whole article title or part of it in the search box. Putting "quotation marks" around the phrase can help to find exactly what you need.
- Click 'View full text' to see the article

If you would like to find any articles about a topic but don't know of any particular resources to look for:

- Search the journals databases found on the [Business Subject Help](#) pages instead.
- You can then use keywords which describe your topic to find articles and other resources. Some databases have more information about some topics than others, so you should try searching a few different databases for all your research areas

If you are having problems with any of this, please contact the Business Academic Liaison Librarian team for help by emailing businesslibrarians@brookes.ac.uk or phoning 01865 485851.
