Digital Media Production

A guide to finding information

The aim of this guide is to introduce you to some of the sources of information held in Oxford Brookes University Library, which may be useful to you during your study of Digital Media Production.

Getting started - Library homepage
http://www.brookes.ac.uk/library/

Need a journal, print or online? Find it here.

Looking for a print book or e-book? Use this.

Hunting for articles or images for your topic? Search a specialist database.

Find your reading list online and link directly through to LibrarySearch for each entry.

LibrarySearch box
Search a range of Library content in one go.

Need help? If the Subject Help pages don’t have the answer, contact your Academic Liaison Librarian.
Finding books and other things

LibrarySearch

The key to finding what the Library holds is LibrarySearch. It includes details of all the material held in this Library, as well as in many other libraries worldwide, and where to find it. Material held at Brookes will be prioritised in the result rankings. You can access LibrarySearch from terminals in the Library, any of the pooled computer rooms or off-campus at:

https://oxfordbrookes.on.worldcat.org/discovery

Most stock of relevance to Digital Media Production students will be found on Levels 2 and 4 of the Headington Library, though other useful materials may be found scattered in several different places in the Library or at our other sites. LibrarySearch includes details of books, journals (see below) and audio-visual material and will tell you if an item is out on loan and, if so, when it is due back. Items on reading lists may have been put in the Short Loan Collection on Level 1; LibrarySearch will give you this information.

You can log in to LibrarySearch and then select My Account to see what you have on loan and check whether your holds (reservations) are ready for you to collect.

Using LibrarySearch

You can search for books using the author and/or key words from the title, eg. Jackman lighting. Search for journals and magazines by title, eg. Sound on Sound. Search by name for people or institutions to find material by or about them, eg. Brian Eno or British Film Institute. When you have run a search the side menu gives you the opportunity to focus your search, for example to a particular format or year. When you have found the item you need check to see that it is on the shelves. If it is, note down the full call number, also known as a shelfmark, including the letters at the end, eg. 777.52/JAC. If the item you need is on loan or at another site click the Place Hold button and make a reservation (hold).

DVDs are shelved alongside the books. Feature films and documentaries are classified according to their director’s nationality. You will also find critical works about the film, biographies of the director and the film script if we have it, all shelved together around the same call number as the film. When you’re looking for a film, you can search by the title, then scroll down the results and choose ‘DVD’ from the ‘Format’ options. If we don’t have a particular DVD, check on BoB (Box of Broadcasts) — see p.4 of this guide. Films on BoB are not listed on LibrarySearch.

The Library has a small selection of video games for Xbox and Playstations 3 & 4. These can be found at shelfmark 794.8.

The BBC Sound FX Recordings, a collection of sound effects, can be found at 792.024/BRI. The Library’s CD collection is on Level 4 of the Library in Zone D.

Reading Lists

You can search for an online version of your reading list by module name or number. There will also be a link to it on Moodle. Items on the reading list are linked to LibrarySearch so one click will tell you the shelfmark and whether the book is on the shelves.

Browsing

You may find it helpful, even inspirational, to go and look at the books on the shelves to see what is relevant to your work. Use the call numbers below to direct your browsing.
Useful call numbers for Digital Media Production

<table>
<thead>
<tr>

Watching films

Viewing DVDs
Most videos and DVDs are available for 1 week loan. Key films on reading lists may have been put into Short Loan where they can be borrowed for 24 hours.

To view films in the Library, you can use the video/DVD/ Blu-Ray players or play DVDs on any of the networked computers – please use headphones.

Box of Broadcasts – see under Key Databases.

Finding journal articles and more

Journals, magazines and newspapers

Journals and magazines can be found in the mobile shelving in the Basement. They are shelved in call number order. All our journals can be found on LibrarySearch by searching under the title of the journal, use the Journal titles tab. To find individual journal articles on your topic - see Databases section below for guidance on tracing information in journals.

Newspapers can be useful sources of information for a wide range of subjects, including reviews of films and feature articles on directors. As they are published frequently, they are often the best sources for current, up-to-date information. More information on searching for news stories can be found in our printed guide News and Current Affairs or from our web page:

http://www.brookes.ac.uk/library/resources/news-and-current-affairs/
Databases

The Library subscribes to a wide range of electronic databases, some of which contain details of journal articles (and sometimes book chapters, book reviews and conference proceedings) on particular subjects. You can search these databases using keywords to find details of relevant articles for your assignments and research. There are also collections of tutorials, image and audio-visual databases and online reference sources.

There are three types of journals database. The first and most basic type provides an indexing service only, providing sufficient bibliographic information (i.e. author and title of the article, the name of the journal, dates and pages) to locate the article. The second type also provides an abstract, that is a brief summary of each article's contents. The third type will provide the full text of the article.

Where articles are not available online in full text the next step is to check LibrarySearch for the titles of journals containing articles you wish to read. When you find the journal you are looking for it is important to check the holdings information to be sure that we have the issue you need. Sometimes we will have a journal in both print and electronic format but the holdings information is likely to be different, you need to choose the format that covers the date you are seeking.

Databases can be accessed on pooled room computers in the Library or in any pooled computer room as well as from outside the University. Usually your Brookes login will be requested, details for those resources with a different login can be found via PIP.

Select the Find a Database tab from the Library homepage to browse by subject or search alphabetically for the resource you need. Below is a list of the most useful databases for Digital Media Production:

Key databases

ACM Digital Library
Full text of every article ever published by ACM and bibliographic citations from major publishers in computing

Box of Broadcasts (BoB)
An online archive giving you access to thousands of recorded radio and TV programmes including films. It allows users to record programmes which will then be stored on the database. Films on BoB are not listed on LibrarySearch.

IEEE Xplore Digital Library
High quality technical literature published since 1988 in the fields of engineering and technology. Includes journal articles, transactions, conference proceedings and standards.

Lynda.com
Online video tutorials covering software, technology, creative and business skills. Digital Media Production students will be added as users and will need to respond to an email in order to activate their account.

Also useful

Academic Search Complete
A multi-disciplinary database that indexes a wide variety of journals including those for film and computing.

Communication & Mass Media Complete
Useful for aspects, especially social and cultural but some technology, of virtual reality, film, television and computer games. Good for information about audiences.
Factiva
International news database covering 152 countries in 22 languages. Includes national and local newspapers as well as trade and professional publications. Also good for company information.

Film Scripts Online Series
Scripts and authorised versions of copyrighted screenplays. Also provides detailed information about scenes, characters and people, including score composers, related to the films.

Performing Arts Periodicals Database
A key database for film but also includes articles on computer games and television.

RILM abstracts of music literature

ScienceDirect Freedom Collection
Contains about 1800 full text journals published by Elsevier, mainly in science, technology and medicine. Full text coverage for most journals in the collection is available from 2002 to present.

Referencing
Acknowledging your sources correctly is a very important part of any academic work you do, failure to do so can affect your marks and may leave you vulnerable to charges of plagiarism. The recommended style for students in the School of Art is Harvard, which is an author/date style. Please check with your department about any specific guidelines they produce (e.g. in a course handbook). The Library produces a guide to citing your references using the Harvard system. The Library guide can be found in the Help Zone on Level 1 of the Library or online at:

http://www.brookes.ac.uk/library/library-services/library-research-guides/

For more detailed guidance you may wish to look at the following:

Cite them right online
Search for the type of resource you need to reference and you will be given clear examples of both in-text and reference list citations.

Pears, R and Shields, G. Cite them right: The essential referencing guide (10th ed.). Basingstoke: Palgrave Macmillan, 2016. 808.02/PEA

If you are still unsure you can talk to your tutor, your Academic Liaison Librarian (contact details below) or Upgrade staff. Upgrade is the University study skills service, for contact details and information about the help it offers go to:

http://www.brookes.ac.uk/services/upgrade/about.html

Managing your references using EndNote
EndNote enables you to collect, store and manage references in your own personal ‘Library’. There is a desktop version available on the Oxford Brookes network, and a web version freely available to all Brookes staff and students.

EndNote is recommended for anyone to improve efficiency when studying, doing research and creating bibliographies. You can enter references manually into your Endnote desktop/web Library or transfer them directly from databases. References from your Library can then be inserted into your Word documents and used to create bibliographies in the style of your choice.
For more information, see our Library web pages at
http://www.brookes.ac.uk/library/library-services/endnote/

The Library runs drop in training sessions on Endnote Web, for times and dates see:

More information

If you need any more information or help please contact your Academic Liaison Librarian, Chris Fowler by email, telephone or at her office, JHB 310, on Level 3 of the Headington Library.
