# Institute of Public Care Commissioning Cycle

# Core underpinning principles or commissioning

- The model outlines the process
- Our fundamental focus is on outcomes, and putting the person at the centre

# Our collective commissioning principles

- All commissioning decisions are based on **sound evidence of need and improving outcomes** for people who have health and/or care needs and their families
- All commissioning activity is **well planned, coordinated and done in a timely manner** so there is a consistent approach to commissioning across a local area
- Processes will be **fair, open and transparent**
- People with care needs will be **safeguarded**
- **Equality, diversity and fairness** considerations will be embedded within all aspects of commissioning practice

# Our collective commissioning principles

- Efficiencies and quality services will be delivered through **robust risk, contract and performance management**
- All commissioned services should operate on an **open book accounting approach**
- Commissioners actively involve individuals and their families meaningfully so they become **co-designers and co-producers**
- **Value for money** underpins commissioning decisions and inefficient, ineffective, or unsustainable services will be **remodelled to improve value for money or decommissioned**
- **Early intervention and prevention** services will be sought to reduce the need for high cost services in the future
