Dear Sir:

As a self-taught psychiatrist, and authority on neurotics, I feel that can offer a useful contribution to most controversial subjects of the day, as so little seems to be known of this subject, and am wondering if a book on such would be eligible for your competition?

If so; please forward particulars of entry.

Am REALIST, and HUMANIST, with no ~~AS~~AS, or am I a FANATIC in any way, and regard this as STRICTLY CONFIDENTIAL between you, and self.

Thanking you, remain,

Yours faithfully,
John Blewett.
