

Neuroscience – The Science of Your Brain
Activity Sheet

Human's are among the limited number of species – including, elephants, orangutans, dolphins, magpies, and ants – who are self-aware, that is, when they look in the mirror they know that is it themselves.

Oxford Brookes researchers Dr Sanjay Kumar and Dr Alfred Veldhuis look into how the self is represented in the brain and how the brain makes ourselves biased for something that relates to us.

Find out more by watching the Self in the Brain video, then have a go at the Self in the Brain Quiz!
