To help us plan the Open Access (OA) workshop, we'd like to know more about your previous experience with OA

This survey should take about 5 minutes to complete.

Individual respondents will not be identifiable to anyone other than the researcher, that is, whilst collated responses may be discussed and shared publicly, you will not be personally identifiable. You will be identifiable only in the raw data which will only be accessed by the researcher and stored and processed in accordance with the Data Protection Act. (Researcher: Emily Bennett; Programme of study: This research is for the partial fulfillment of the MSc in Information and Library Management.) If you have any questions, please contact emily.bennett@port.ac.uk, Research Outputs Manager, University Library.

Your username (emily.bennett@port.ac.uk) will be recorded when you submit this form. Not emily.bennett? Sign out

*Required

1. I have been briefed about this research project and its purpose and agree to participate. *
   Mark only one oval.

Open Access (OA)

Open Access (OA) means making the full-text version of a research output, e.g. a journal article, available online for anyone to access without financial cost.

OA can apply to a range of outputs. However, we're focusing on JOURNAL ARTICLES and articles in CONFERENCE PROCEEDINGS to reflect major policies.

This includes both fully OA journals and subscription (hybrid) journals that have an OA option.

3. Have you previously made your work OA? *
   Mark only one oval.
   ○ Yes
   ○ No
4. If you answered 'yes' to the previous question, how did you make your work OA?
   Tick all that apply.
   - [ ] Uploaded it to the University's institutional repository, e.g. Pure/ePrints/Parade
   - [ ] Uploaded it to a subject specific repository, e.g. Arxiv
   - [ ] Uploaded it to the University's website
   - [ ] Uploaded it to a personal website
   - [ ] Social networking site, e.g. ResearchGate
   - [ ] Published it in a fully Open Access journal
   - [ ] Published it in a subscription (hybrid) journal and paid an article processing charge (APC) to make the article OA.
   - [ ] Other: .....................................................................................................................

5. How important to you are the following reasons for making your work Open Access? *

**Bibliometrics**

The push towards Open Access has changed the scholarly communication landscape, creating new opportunities and models of publishing. Bibliometrics is one tool that can be used for evaluating publications.
