

Thema Project: Reflective Survey (Appl L'scape Archaeology)

About this survey

Welcome! This is the second of the two online surveys that you have agreed to complete for the Thema project. It asks you to tell us about your general experience of the first year of the Applied Landscape Archaeology course, as well as the use that you, and your tutors, have made of digital technologies (i.e. computers, mobile phones, digital cameras and specialist equipment, together with the programs and Websites that run on them). Note that we have had to make many of the questions consistent with the survey sent to our full-time students, and so some of the answer choices may not be directly relevant to your situation.

The questions are divided into four sections (pages). Some require you to tick the response(s) closest to your opinion; others ask you to express your own thoughts. Questions marked * require an answer. If you leave any of these blank and click "Next Page," the current page will be redisplayed with a message in red above the unanswered question.

You need to allow 20-30 minutes to complete the survey. However, if you don't have time right now, then exit without answering any questions and come back later. If you encounter any problems when you're answering the questions, contact me at the email address below.

When you have finished...

Click the "Finish" button after the final question (NB Don't click the Cancel message or close this browser window as you'll lose everything that you have written).

Please complete the survey by Friday, 26th September.

Thank you,

Liz Masterman, Thema Project Manager
